# *Dpage readme*

## ***Presentation***

*Dpage* puts two postscript page produced by *Heirloom dpost* on a single sheet of paper. Actually, it can only put two A4 page on an A3 page. *Dpage* don't transform the size of the pages. It can be used after *psbook* to produce booklets.

## ***Build and install***

To build and install, edit the file `config.mk` from the root directory, and run :

```
| make install
```

In some circumstances, you might need utroff tools themselves to build the manual pages. In that case, build and install binaries before manual pages like this :

```
| make installbin  
| make installman
```

You can uninstall files and clean the working directory :

```
| make uninstall  
| make clean
```

For a more complete description of the build process, look at the README in the root directory.

## ***License***

*Dpage* and its man page are distributed under a two clause BSD license<sup>1</sup>.

# *Dpage manual*

## **Name**

**Dpage** – dpage puts two postscript page on a single sheet of paper.

## **Synopsis**

@BINDIR@dpage file

## **Description**

*Dpage* puts two postscript page produced by *Heirloom dpost* on a single sheet of paper. Actually, it can only put two A4 page on an A3 page. Dpage don't transform the size of the pages. It can be used after *psbook* to produce booklets.

## **Example**

To produce a booklet from a troff file, you can use the following command line :

```
| troff f.tr | dpost | psbook -s16 | dpage | ps2pdf - f.pdf
```

Once done, you just have to print the document, fold the sheets, and bind your book.
